EDUCATION

- **Hebei University of Technology** China
Bachelor of Communication Engineering; GPA: 3.7/4 (Ranking: top 5%) 2016 - 2020
- **Australian National University** Australia
MPhil of Machine Learning and Computer Vision 2021 - 2023
- **Australian National University** Australia
Doctor of Philosophy 2023 - current

RESEARCH PROJECTS AND GRANTS

- **Research internship at UCLA ([Code](#))** Jul 2019 - Nov 2019
Hyperspectral image Classification with deep learning approach.
 - **Ablation Study Design:** Data enhancement with conditional generative adversarial networks (CGAN) on the hyperspectral image. Explore the model's performance using 2D/3D convolution neural network.
- **Graduation Design ([Paper](#))** Dec 2019 - Jun 2020
Hand recognition based on Raspberry Pi and hand gesture dataset collection.
 - **Algorithm Deployment:** Deploy light-weight hand gesture detection model on Raspberry Pi platform.
 - **Dataset Collection:** Proposed two comprehensive hand gesture dataset. Dataset1 for image classification contains 7 types of gesture, a total of 10490 images and 120 persons are collected. Dataset2 for object detection consists of 7 hand gestures, each amounting to one thousand photos requested from the Internet.
 - **Impact:** My graduation thesis won "Excellent Graduation Thesis of Hebei University of Technology Award" and "Tianjin Excellent Graduation Thesis Award" in 2020.
- **Data Business Analysis ([Code](#))** Jul 2020 - Jul 2021
Analysis of customer electricity consumption based on the distribution of solar electric panels.
 - **Algorithm Design:** Proposed multitasking detection network to detect the spatial distribution of solar panels and used K-Means clustering to recommend the potential grid address.
 - **Impact:** Our technical solution was adopted by the Western Australia Energy Company, Synergy, and received the funding of **AUD 16000**.
- **Multiview cattle monitoring ([Dataset](#), [Code](#), [Paper](#))** Mar 2021 - Dec 2021
Multiview cattle detection and synthetic dataset generation.
 - **MultiviewC dataset:** Proposed the MultiviewC dataset which mainly contributes to multiview cattle action recognition, 3D object detection and tracking.
 - **Algorithm Design:** Proposed multiview detection pipeline for cattle detection to handle the occlusion problem in crowded scene.
- **Multiview pedestrian detection ([Paper](#))** Dec 2021 - Jul 2022
Multiview pedestrian detection utilizing various camera views.
 - **Algorithm Design:** Proposed a deep learning based multiview pedestrian detection algorithm for multiview pedestrian detection with very competitive results.
 - **Publication:** Already finished a paper and the paper is submitted on arXiv and is prepare to be submitted to AAAI

HONORS AND AWARDS

- Outstanding Graduates, Hebei University of Technology, Jun.2020
- Merit Student for two consecutive years, Hebei University of Technology, 2019-2020
- Excellent Graduation Thesis of Hebei University of Technology and Tianjin Excellent Graduation Thesis, 2020

SKILLS SUMMARY

- **Languages:** Python, Java, C\C++
- **Platform:** Unreal Engine 4, Unity
- **Libraries:** Tensorflow, Pytorch, Opencv, Open3D
